## PROFILE

I am an aspiring Full Stack Developer with a strong foundation in front-end and back-end technologies. I have knowledge of Java, Spring Boot, HTML, CSS, JavaScript, React, SQL, and Git. I am eager to begin my professional career, gain practical experience, and contribute to developing efficient and user-friendly web applications. I am committed to continuous learning, improving my technical skills, and delivering quality results while growing with the organization.

## EDUCATION

|                                                                      |                         |
|----------------------------------------------------------------------|-------------------------|
| <b>Jay Somnath High School</b><br><i>HSC Pass</i>                    | 2017 – 2018   Ahmedabad |
| <b>Parul University</b><br><i>Diploma In Agriculture Engineering</i> | 2018 – 2020   Vadodara  |

## TECHNICAL SKILLS

- HTML/CSS
- BOOTSTRAP
- JAVASCRIPT
- REACT
- HIBERNATE
- JAVA
- SPRING
- SPRINGBOOT

## PROJECTS

- Gardener**  
Developed a modern and responsive e-commerce frontend application for an online gardening platform using React.js, JavaScript (ES6+), HTML5, CSS3, and Bootstrap. Designed an intuitive user interface that enables customers to browse plants, seeds, gardening tools, and accessories with a seamless shopping experience. Implemented reusable React components, React Router for dynamic navigation, state management, responsive layouts, product filtering, search functionality, shopping cart, and interactive product pages. Integrated REST APIs for fetching product data and optimized application performance through component-based architecture and efficient rendering. Focused on delivering a user-friendly, mobile-responsive, and visually appealing interface while following modern frontend development best practices and clean code principles.
- E-Commerce shopping Website**  
Designed and developed a full-stack E-Commerce Shopping Website using Java, Hibernate, React.js, Spring Boot, MySQL, HTML5, CSS3, and JavaScript. Built a secure and scalable application featuring user authentication, product catalog management, advanced search and filtering, shopping cart, wishlist, order placement, and payment-ready architecture. Implemented RESTful APIs with Spring Boot and used Hibernate ORM for efficient database mapping, CRUD operations, transaction management, and optimized data persistence. Developed a responsive and interactive frontend with React.js, utilizing reusable components, React Router, and state management to deliver a seamless user experience across devices. Followed MVC architecture, object-oriented programming principles, and clean coding practices while integrating backend services with the frontend for efficient data flow and high application performance.
